

2020

Engineering, Procurement, Construction, Testing, Commissioning, Trial Run and Operation & Maintenance of Various Components of "Rajond, Narmada Lower & Maan Multi-Village Schemes, District Dhar and Nimrani Multi-Village Scheme, District Khargone " in Single Package on Turn-Key Job Basis.

PHANS4 CONSULTING PVT. LTD.

ITEMS	DESCRIPTION
NIT	47/Proc./MPJNM/2019-20
TITLE	Engineering, procurement, construction, testing, commissioning, trial run and operation & maintenance of various components of "Rajond, Narmada Lower & Maan Multi-Village Schemes, District Dhar and Nimrani Multi-Village Scheme, District Khargone" in single package on 'turn-key job basis' including trial run and operation & maintenance of the entire scheme for 10 years. Scheme 1 – Dhar(Rajond) – 94 Cr. Scheme 2 – Dhar(Narmada Lower) - 204 Cr. Scheme 3 – Dhar (Maan)– 218 Cr Scheme 4 – Nimrani – 284 Cr.
BRIEF SCOPE OF WORK	<ol style="list-style-type: none"> 1. The successful bidder has to carry out entire work of Planning, Survey, Soil investigation, Designing, Construction as per the Schedule program, testing, commissioning, trial run of completed scheme and 10 years operation & maintenance of entire water supply scheme after getting a confirmatory survey done with the intention to serve the basic purpose of contract, that is to ensure the supply of drinking water in designated quantity to all villagers & to customers/ institutions/ offices identified for bulk water usage located within the revenue boundary of villages as listed vide Appendix-I. 2. The bidder is/ are required to carry out the survey including necessary data collection from concerning division of PHED of old water supply schemes and if the existing components i.e. pipe line, OHT/ GSR, etc.
TYPE OF CONTRACT	Lump Sum Contract
COST	801.41 Crores
EMD	50 Lakhs
TIME OF COMPLETION	Scheme 1 – Dhar (Rajond) - 24 Months Scheme 2 – Dhar(Narmada Lower) - 30 Months Scheme 3 – Dhar (Maan) - 30 Months Scheme 4 – Khargone (Nimrani) – 36 Months
SUBMISSION OF TENDER	Cover 1 – Prequalification And Emd Cover 2 - Technical Cover 3 – Financial
FINACIAL CRITERIA	The bidder or jv should have average annual turnover of at least 50% of tpac in last 3 financial years preceding the tender submission date at current price level (2018-19).
TECHNICAL CRITERIA	The Bidder or Lead Partner in case of JV must have experience of executing satisfactorily completely or substantially completed (substantially completed means not less than 90% of agreement value, and for which certificate is issued) integrated water supply scheme comprising of raw water intake well cum pump house, ESR/OHBR, raw / clear water reservoir / GSR, Water Treatment Plant, pipe line work within last seven years from the date of bid notification as follows: i. Three works costing not less than the amount equal to 40% of the TPAC. or ii. Two works costing not less than the amount equal to 50% of the TPAC. or

PHANS4 CONSULTING PVT. LTD.

	iii. One work costing not less than the amount equal to 80% of the TPAC.
O & M	The Bidder or Lead Partner in case of JV should have executed, commissioned, and post-commissioning, operated and maintained satisfactorily for minimum 36 months at least one similar integrated water supply work of minimum 10% of TPAC comprising of intake well, pumping machinery, water treatment plant, pipeline and elevated storage reservoir.
WORKING CAPTIAL	Should not be less than 15% of the TPAC
NET WORTH	Net Worth of the bidder or JV of last Financial Year should not be less than 10% of the TPAC
SECURITY DEPOSIT	Shall be equal to 10% (ten percent) of the sum of amount of contract in the form of the unconditional and irrevocable bank guarantee executed.
PRE-BID MEETING	Office of The Managing Director, Madhya Pradesh Jal Nigam, D-Wing, 2nd Floor, Vindhyaachal Bhawan, Bhopal (M.P.) PIN – 462004.
IMPORTANT DATES	Bid Submission Date 27-Jul-2020 05:30PM Pre Bid Meeting Date 08-Jul-2020 03:00 PM

TECHNICAL ASPECTS AND DETAILED PROJECT SCOPE

P.T.O

PHANS4 CONSULTING PVT. LTD.

SCHEME 1 - MAIN WORKS FOR RAJOND MULTI-VILLAGE SCHEME

No.	Main Works																																																																		
1	Construction of 7.0 m diameter and 32 m deep R.C.C Intake well (including 5 m High Pump house) of required capacity in 23 hours operation flow with provision for automation (SCADA), construction of R.C.C Foot Bridge (approach bridge) approximately 55 meters, minimum 3.5 m wide with approach road (excluding space for pipeline, kerb, cable duct, railing, electric poles, etc.) & all other necessary/ ancillary structures required at the Mahi Dam near Gondikheda Charan village, Dhar District.																																																																		
2	Raw water pumping main of 450 mm diameter DI-K9 pipe of length approximately 2600m including flow meters, valves, sluice valves, air valves, scour valves, valve chambers, thrust blocks, crossings, specials & accessories etc. complete including road restoration.																																																																		
3	Water treatment plant to provide 15.84 million litre treated clear water in 23 hours i/c automation (SCADA), with clear water sump having a storage capacity of 45 minutes of overall clear water demand for the design year, complete near Lambriya village, District Dhar i/c construction of boundary wall, internal roads, electrification, laboratory, office building etc., and all other necessary ancillary structures required.																																																																		
4	Providing, laying, jointing and Commissioning of clear water pumping main having an approximate length as detailed below with in-lining and out-coating as per IS 8329 i/c flow meter, valves, sluice valves, air valves, scour valves, valve chambers, thrust blocks, crossings, specials & accessories etc. complete including road restoration.

	<p>All MBR/ BPT/ IPS/ WTP shall have boundary wall as defined in bid document but all ESRs/ GSRs shall have G.I. Chain link fabric fencing of mesh size 25x25mm made of G.I. wire of 3 mm dia. i/c strengthening with welding or nuts, bolt & washers etc. complete. It shall have ISA 50x50x5mm angle iron post at spacing 2.5 m centre to centre of height 2.0 m. above ground level embedded in M20 cement concrete 30x30 cm pillar min. 75 cm below ground level. Every 7th post & corner shall be strutted with similar specification angle iron & grouting. The top & bottom of chain link as well as on angle a 25x3 mm flat secured with either weld or rivets or bolts, to make fencing safer, shall be provided. It shall have angle iron gate of size 3.0m x 1.8m having ISA 50x50x5mm angle iron & 16mm dia square plain M.S. bar i/c AL drop, holdfast etc. and shall be fixed up in 45x45 cm wide R.C.C. pillars. An additional gate of size 0.6mx1.5m shall also be provided within the same gate, to avoid opening of bigger gate all the time & made of IS 40x40x5mm angle iron with AL drop, etc. One Room set of min. area 25 sq.m. size with W.C. & toilet and housing of automation system and Solar/single phase electrification with area lighting, landscaping, plantation of the area, etc. complete. The size of fencing or boundary wall shall be 20x20m i.e. overall 80m i/c gate, for these structures & if it increases or decreases then accordingly variation shall be paid or deducted as per UADD ISOR w.e.f. 1st May 2012 with up to date amendments</p>																				
	<p>b) Construction of Clear Water Sump cum pump houses with following capacity.</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Sl.</th> <th style="text-align: center;">At Village</th> <th style="text-align: center;">Item</th> <th style="text-align: center;">Capacity (KL)</th> <th style="text-align: center;">Staging Height No. (m)</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">Near WTP (Lambariya)</td> <td style="text-align: center;">Sump</td> <td style="text-align: center;">900</td> <td style="text-align: center;">0</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">Chanvadiya Khurd</td> <td style="text-align: center;">Sump</td> <td style="text-align: center;">280</td> <td style="text-align: center;">0</td> </tr> </tbody> </table>						Sl. 	<p>The CW sump cum pump houses and GLBR will have 2 m high Boundary Wall with 'Y' shape angle iron having 2*3 rows of barbed wire fencing at top of boundary wall and gate, one Room set of area 25 sq. m. size with toilet, automation system and electrification with area lighting, etc. complete.</p>																				
7	<p>Distribution network for an approximate length as detailed below comprising of: HDPE, PE100 PN6 (minimum) pipelines including valves, specials and other allied works of following diameters-</p>																				

PHANS4 CONSULTING PVT. LTD.

No.	Main Works
	a. 90 mm dia. minimum 6 kg/cm ² pressure – 286.6 km
	b. 110 mm dia. minimum 6 kg/cm ² pressure – 32.45 km
	c. 160 mm dia. minimum 6 kg/cm ² pressure – 36.42 km
	d. 200 mm dia. minimum 6 kg/cm ² pressure – 24.3 km
	e. 250 mm dia. minimum 6 kg/cm ² pressure – 2.7 km
	f. 80 mm dia. DI-K7 – 2.4 km
	g. 100 mm dia. DI-K7 – 0.6 km
	f. 150 mm dia. DI-K7 – 0.7 km
	f. 200 mm dia. DI-K7 – 0.2 km
	f. 250 mm dia. DI-K7 – 35m
	Pipe line i/c valves, sluice valves, air valves, scour valves, valve chambers, thrust block, bulk water meters for all villages, specials & accessories etc. complete including road restoration.
8	<p>Pumping equipment including suitable motors, protection equipment's for following-</p> <p>(A) Providing and installation of 4 Nos. suitable energy efficient deep well vertical turbine pumps for raw water at Intake well cum pump house i/c automation as under:</p> <p>a) 2 No. pumps of 5220 lpm discharge each and approx. 35 m head</p> <p>b) 2 No. pumps of 2640 lpm discharge each and approx. 35 m head The pumps given above are inclusive of standby pumps (50% standby)</p> <p>(B) Providing and installation of suitable energy efficient Centrifugal pumps for Clear water at CW sump cum pump house at WTP to Deopur MBR i/c automation as under:</p> <p>For CWR-1 at WTP:</p> <p>a) 2 Nos. pumps of 4980 lpm discharge each and approx. 104m head</p> <p>b) 2 Nos. pumps of 2520 lpm discharge each and approx. 104 m head</p> <p>For CWR-2 at Chanvadiya Khurd</p> <p>a) 2 Nos. pumps of 1980 lpm discharge each and approx. 74m head</p> <p>b) 2 Nos. pumps of 1020 lpm discharge each and approx. 74m head</p> <p>(The pumps given above are inclusive of standby pumps)</p>
9	<p>Provision for an approximate length of 10 km long dedicated 33KV/ 11 KV power supply from nearby Substation to WTP, Intake well cum pump house inclusive of all allied works complete. Provision of stretching suitable capacity electric line and taking connection for CWS cum pump houses. Any other work necessary to cater the power supply demand of the project (as variation). The work includes construction of substations and stretching of power lines and internal and external electrification etc. complete at all component.</p>
10	<p>Supply, installing, testing and commissioning of following sized transformers and other ancillary works required, along with suitable sized transformer yards complete in all respects as per specifications:</p> <p>i. 2 (1W+1S) Number 160 kVA at Raw Water Pump House/ Intake</p> <p>ii. 2 (1W+1S) Number 315 kVA at WTP/ Clear Water Pump House</p> <p>iii. 2 (1W+1S) Number 63 kVA at IPS-1 (Chanyadiya Khurd)</p> <p>The locations of installation of transfers are, Raw water Intake Pump House, Clear Water Pump</p>

PHANS4 CONSULTING PVT. LTD.

No.	Main Works
	House, WTP, Intermediate Pump Houses etc. If additional transformers are required than the same has to be installed at the required location. 100% standby transformer capacity is to be maintained at each installation site of transformers.
11	Design, Supply, Delivery, Erection, Testing & Commissioning of Automation Components for Monitoring & Maintenance with GPRS Communication with all necessary accessories. (SCADA)
12	House Service Connection approximately 28880 Nos. (up to end of O&M Period)
13	Construction of Staff Quarter / Office Building: Office Building/Admin block - 01 No. in WTP campus - 225 sqm. Store Building - 01 No. – 75 sqm F-type staff quarter with minimum plinth area 46.5 Sqm each - 01 No. G- type staff quarter with minimum plinth area 93.0 Sqm each - 02 Nos. H- type staff quarter with minimum plinth area 46.5 Sqm each - 04 Nos. I- type staff quarter with minimum plinth area 32.5 Sqm each - 04 Nos. Office Building of plinth area approximately 400 sqm at place directed by MPJN The buildings shall be constructed as per specifications and directions of Engineer-in-Charge
14	Operation & Maintenance of the Whole Scheme for first year The Operation and Maintenance cost for the first year, in terms of percentage of contract Amount is given in Annexure H. For every subsequent year, the first-year percentage rates will be increased / decreased according to the percentage change in consumer price index issued by Labour Bureau, GOI (All Industrial Worker) for that period. The index on the date of completion of trial run period will be treated as base for calculation of percentage point increase/decrease in O&M cost of next year. Payment of O&M will be made quarterly. NOTE: a) The operation & maintenance period is 10 years from the date of completion of three months of trial run after successful commissioning of the project. b) The cost of energy charges (excluding penalties) shall be paid by MPJN on reimbursement basis. c) Energy Requirement: The estimation for yearly consumption of energy is 19,62,877 kWh (Unit) for design period. d) If due to any reasons, whatsoever it is desired to supply water in some of the villages before final commissioning and trial run, then the pro-rata rates derived from the Annexure H shall be applicable for the part payment on the basis of duration and quantity supplied, but the date of commissioning of whole work shall be applicable from the dates as stipulated in this contract

PHANS4 CONSULTING PVT. LTD.

SCHEME 2 - MAIN WORKS FOR NARMADA LOWER MULTI-VILLAGE SCHEME

No.	Main Works																					
1	Construction of 14.0 m diameter and 42.00 m deep R.C.C Intake well & 14.0 m dia & 8.5 m High Pump house of required capacity in 23 hours operation flow with provision for automation (SCADA), construction of R.C.C Foot Bridge (approach bridge) approximately 200 meters, minimum 5.0 m wide with approach road (excluding space for pipeline, kerb, cable duct, railing, electric poles, etc.) & all other necessary/ ancillary structures required at the bank of Narmada River near Barda Village, Dhar District.																					
2	Raw water pumping main of 1300 mm diameter MS pipe (10mm thickness) of length approximately 8080m including flow meters, valves, sluice valves, air valves, scour valves, valve chambers, thrust blocks, crossings, specials & accessories etc. complete including road restoration.																					
3	Water treatment plant to provide 30.82 million litre treated clear water in 23 hours i/c automation (SCADA), with clear water sump having a storage capacity of 45 minutes of overall clear water demand for the design year, complete near Limbi Village, District Dhar i/c construction of boundary wall, internal roads, electrification, laboratory, office building etc., and all other necessary ancillary structures required.																					
4	<p>Providing, laying, jointing and Commissioning of clear water pumping main having a approximate length of 44 km of DI-K9 and MS (8mm) Pipe with in-lining and out-coating as per IS: 8329 and IS: 1239 i/c flow meter, valves, sluice valves, air valves, scour valves, valve chambers, thrust blocks, crossings, specials & accessories etc. complete including road restoration.</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Type of Pipe</th> <th style="text-align: center;">Diameter in MM</th> <th style="text-align: center;">Length (m)</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">DI-K7</td> <td style="text-align: center;">300</td> <td style="text-align: center;">39029</td> </tr> <tr> <td style="text-align: center;">DI-K7</td> <td style="text-align: center;">500</td> <td style="text-align: center;">422</td> </tr> <tr> <td style="text-align: center;">DI-K9</td> <td style="text-align: center;">500</td> <td style="text-align: center;">3804</td> </tr> <tr> <td style="text-align: center;">MS (8 mm)</td> <td style="text-align: center;">600</td> <td style="text-align: center;">847</td> </tr> </tbody> </table>	Type of Pipe	Diameter in MM	Length (m)	DI-K7	300	39029	DI-K7	500	422	DI-K9	500	3804	MS (8 mm)	600	847

PHANS4 CONSULTING PVT. LTD.

No.	Main Works																									
	<p>All MBR/ BPT/ IPS/ WTP shall have boundary wall as defined in bid document but all ESRs/ GSRs shall have G.I. Chain link fabric fencing of mesh size 25x25mm made of G.I. wire of 3 mm dia. i/c strengthening with welding or nuts, bolt & washers etc. complete. It shall have ISA 50x50x5mm angle iron post at spacing 2.5 m centre to centre of height 2.0 m. above ground level embedded in M20 cement concrete 30x30 cm pillar min. 75 cm below ground level. Every 7th post & corner shall be strutted with similar specification angle iron & grouting. The top & bottom of chain link as well as on angle a 25x3 mm flat secured with either weld or rivets or bolts, to make fencing safer, shall be provided. It shall have angle iron gate of size 3.0m x 1.8m having ISA 50x50x5mm angle iron & 16mm dia square plain</p> <p>M.S. bar i/c AL drop, holdfast etc. and shall be fixed up in 45x45 cm wide R.C.C. pillars. An additional gate of size 0.6mx1.5m shall also be provided within the same gate, to avoid opening of bigger gate all the time & made of IS 40x40x5mm angle iron with AL drop, etc. One Room set of min. area 25 sq.m. size with W.C. & toilet and housing of automation system and Solar/single phase electrification with area lighting, landscaping, plantation of the area, etc. complete.</p> <p>The size of fencing or boundary wall shall be 20x20m i.e. overall 80m i/c gate, for these structures & if it increases or decreases then accordingly variation shall be paid or deducted as per UADD ISOR w.e.f. 1st May 2012 with up to date amendments</p>

SCHEME 3 - MAIN WORKS FOR MAAN DAM MULTI-VILLAGE SCHEME

No.	Main Works																									
1	Construction of Intake well cum pump house having minimum 7 m diameter and approx. 40.5 m (including pump room 8.5m high) deep, 39.31 MLD capacity in 23 hours flow with provision for automation, construction of R.C.C Foot Bridge (approach bridge) approx. 100 meters, min. 5.0 m wide with approach road (excluding space for pipeline, kerb, cable duct, railing, electric poles, etc) & all other necessary/ ancillary structures required at the bank of Maan Dam near Jeerabad village, Dhar District. Raw water shall be taken from the back water of the dam by intake well.																									
2	Raw water pumping main of 700 mm diameter MS (8mm) pipe of length approximately 3074m including flow meters, valves, sluice valves, air valves, scour valves, valve chambers, thrust blocks, crossings, specials & accessories etc. complete including road restoration.																									
3	Water treatment plant to provide 29.47 million litre treated clear water in 23 hours i/c automation, with clear water sump having a storage capacity of 45 minutes of overall clear water demand for the design year, complete near village Rojabediya village, District Dhar i/c construction of boundary wall, internal roads, electrification, staff quarters, laboratory, office building etc., and all other necessary/ancillary structures required.																									
4	<p>Providing, laying, jointing and Commissioning of clear water pumping main having an approximate length of 51450m of DI class K9 Pipe with in-lining and out-coating as per IS 8329 i/c flow meter, valves, sluice valves, air valves, scour valves, valve chambers, thrust blocks, crossings, specials & accessories etc. complete including road restoration.</p> <table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Type of Pipe</th> <th style="text-align: center;">Diameter in MM</th> <th style="text-align: center;">Length (km) K9</th> </tr> </thead> <tbody> <tr> <td></td> <td style="text-align: center;">400</td> <td style="text-align: center;">8.15</td> </tr> <tr> <td></td> <td style="text-align: center;">450</td> <td style="text-align: center;">26.98</td> </tr> <tr> <td style="text-align: center;">MS (8mm)</td> <td style="text-align: center;">600</td> <td style="text-align: center;">25.02</td> </tr> </tbody> </table>	Type of Pipe	Diameter in MM	Length (km) K9		400	8.15		450	26.98	MS (8mm)	600	25.02

	HDPE & DI Pipe line i/c valves, sluice valves, air valves, scour valves, valve chambers, thrust block, bulk water meters for all villages, specials & accessories etc. complete including road restoration.					

PHANS4 CONSULTING PVT. LTD.

Main Works

Pumping equipment including suitable motors, protection equipment's for following-

(A) Providing and installation of 4 Nos. suitable energy efficient deep well vertical turbine pumps for raw water at Intake well cum pump house i/c automation as under:

- (a) 2 No. pumps of 17188 lpm discharge each and approx. 75 m head
- (b) 2 No. pumps of 8594 lpm discharge and approx. 75 m head

The pumps given above are inclusive of standby pumps (50% standby)

(B) Providing and installation of suitable energy efficient Centrifugal pumps for Clear water at CW sump cum pump house at WTP, and CW sump cum pump houses for intermediate pumping stations-1, 2, 3, 4 and 5 i/c automation as under:

From CW Sump to IPS-1:

- (a) 3 Nos. (2W+1S) pumps of 16326 lpm discharge each and approx. 107m head

From IPS-1 to IPS-2:

- (a) 3 Nos. (2W + 1 S) pumps of 16326 lpm discharge each and approx. 95m head

From IPS-2 to OHMBR:

- (a) 3 Nos. (2W + 1 S) pumps of 16326 lpm discharge each and approx. 145m head

Provision for an approximate 40 km long dedicated 33KV power supply line from nearby Substations to WTP, Intake well cum pump house inclusive of all allied works complete.

Provision of stretching suitable capacity electric line and taking connection for CWS cum pump houses. Any other work necessary to cater the power supply demand of the project (as variation).

The work includes construction of substations and stretching of power lines and internal and external electrification etc. complete at all components.

Supply, installing, testing and commissioning of following sized transformers and other ancillary works required, along with suitable sized transformer yards complete in all respects as per specifications:

- vii. 4 (2W+2S) Number 1000 kVA
- viii. 2 (1W+1S) Number 630kVA
- ix. 2 (1W+1S) Number 500kVA

The locations of installation of transfers are, Raw water Intake Pump House, Clear Water Pump House, WTP, Intermediate Pump Houses etc.

100% standby transformer capacity is to be maintained at each installation site of transformers.

Design, Supply, Delivery, Erection, Testing & Commissioning of Automation Components for Monitoring & Maintenance with GPRS Communication with all necessary accessories. (SCADA)

House Service Connection approximately 39840 Nos. (up to end of O&M Period)

Construction of Staff Quarter / Office Building:

Office Building/Admin block - 01 No. in WTP campus - 225 sqm. Store Building - 01 No. – 75 sqm

F-type staff quarter with minimum plinth area 46.5 Sqm each – 01 No. G-type staff quarter with

minimum plinth area 93.0 Sqm each - 02 Nos. H-type staff quarter with minimum plinth area 46.5 Sqm

each - 04 Nos. I-type staff quarter with minimum plinth area 32.5 Sqm each - 04 Nos.

Office Building of 400 sqm at place directed by MPJN

PHANS4 CONSULTING PVT. LTD.

No.	Main Works
14	<p>Operation & Maintenance of the Whole Scheme for first year</p> <p>The Operation and Maintenance cost for the first year, in terms of percentage of contract Amount is given in Annexure H.</p> <p>For every subsequent year, the first-year percentage rates will be increased / decreased according to the percentage change in consumer price index issued by Labour Bureau, GOI (All Industrial Worker) for that period. The index on the date of completion of trial run period will be treated as base for calculation of percentage point increase/decrease in O&M cost of next year. Payment of O&M will be made quarterly.</p> <p>NOTE:</p> <ul style="list-style-type: none">a) The operation & maintenance period is 10 years from the date of completion of three months of trial run after successful commissioning of the project.b) The cost of energy charges (excluding penalties) shall be paid by MPJN on reimbursement basis.c) Energy Requirement: The estimation for maximum yearly consumption of energy is 1,70,84,406 kWh (Unit) for design period. Any units above this shall not be considered for reimbursement by MPJN.d) If due to any reasons, whatsoever it is desired to supply water in some of the villages before final commissioning and trial run, then the pro-rata rates derived from the Annexure H shall be applicable for the part payment on the basis of duration and quantity supplied, but the date of commissioning of whole work shall be applicable from the dates as stipulated in this contract

PHANS4 CONSULTING PVT. LTD.

SCHEME 4 - MAIN WORKS FOR NIMRANI MULTI-VILLAGE SCHEME

No.	Main Works		
1	Construction of intake well cum pump house having minimum 10 m diameter and approx. 46m (including pump room 7m high) deep to draw a total of 26.9 million liters of water in 23 hours flow with provision for automation, construction of RCC Foot Bridge (approach bridge) approx. 750 meters long, minimum 5 m wide with approach road (excluding space for pipeline, kerb, cable duct, railing, electric poles, etc.) & all other necessary/ ancillary structures required at the bank of Narmada River near Lepa village, Khargone District.		
2	Raw water pumping main of 500 mm diameter DI-K9 of length approximately 10.8km including flow meters, valves, sluice valves, air valves, scour valves, valve chambers, thrust blocks, crossings, specials & accessories, etc. complete including road restoration.		
3	Water treatment plant to provide 23.09 million liters of treated clear water in 23 hours near Kasrawad village, Khargone District including automation (SCADA), construction of boundary wall, internal roads, electrification, laboratory, etc., and all other necessary/ancillary structures required.		
4	Providing, laying, jointing, testing and commissioning of clear water pumping main of diameter and approximate length as detailed below of DI-K9 Pipe with in-lining and out-coating as per IS 8329 including flow meter, valves, sluice valves, air valves, scour valves, valve chambers, thrust blocks, crossings, specials & accessories, etc. complete including road restoration.		
	Type of Pipe	Diameter (mm)	Length (km)
	DI-K9	100	16.9
		150	2.8
		350	0.2
		400	0.5
		450	18.7
5	Providing, laying, jointing, testing and commissioning of clear water trunk main, DI (K-9 or K-7) as per IS 8329 and/ or MS pipe as per IS specified in specification including flow meters, valves, sluice valves, air valves, scour valves, valve chambers, thrust block, crossings (rail and road), specials & accessories, etc. complete including road restoration of diameter and corresponding length as detailed below:		
	Type of Pipe	Diameter in MM	Length in KM

	<p>All MBR/ BPT/ IPS/ WTP shall have boundary wall as defined in bid document but all ESRs/ GSRs shall have G.I. chain link fabric fencing of mesh size 25x25mm made of G.I. wire of 3 mm diameter including strengthening with welding or nuts, bolt & washers etc. complete. It</p>																						

PHANS4 CONSULTING PVT. LTD.

No.	Main Works																		
	<p>shall have ISA 50x50x5mm angle iron post at a spacing 2.5 m centre to centre of height 2m above ground level embedded in M20 cement concrete 30x30 cm pillar minimum 75cm below ground level. Every 7th post & corners shall be strutted with similar specification angle iron & grouting. The top & bottom of chain link as well as on angle a 25x3mm flat secured with either weld or rivets or bolts, to make fencing safer, shall be provided. It shall have angle iron gate of size 3.0m x 1.8m having ISA 50x50x5mm angle iron & 16mm diameter plain M.S. bar including AL drop, holdfast etc. and shall be fixed up in 45x45 cm wide R.C.C. pillars. An additional gate of size 0.6mx1.5m shall also be provided within the same gate, to avoid opening of bigger gate all the time & it shall be made of IS 40x40x5mm angle iron with AL drop, etc.</p> <p>The CW sump cum pump houses and GLBR/ MBR/ BPT will have 2m high boundary wall with 'Y' shape angle iron with 2*3 rows of wire bed, wire fencing at top of boundary wall and gate, one room set of area 25sqm size with W.C. & bathroom, automation system and electrification with area lighting, etc. complete.</p> <p>The size of fencing or boundary wall shall be 20x20m including gate for these structures & if it increases or decreases then accordingly variation shall be paid or deducted as per UADD ISOR w.e.f. 1st May 2012 (with up to date amendments).</p> <p>One room set of minimum area 25 sqm size with W.C. & bathroom and housing of automation system and solar/ single phase electrification with area lighting, landscaping, plantation, etc. complete.</p> <p>The approach road for the MBR, OHSR, etc. shall be of approx. 30 m for each location. Any alteration to the total length of approach roads considering all structures shall be paid or deducted as per the MPPWD SOR w.e.f. 29th August 2017 (with up to date amendments). The length of the approach road shall be finalized by the Engineer-in-Charge.</p>																		
7	<p>Distribution network of diameter and approximate length as detailed below comprising of HDPE, PE100 PN6 (minimum) and DI-K7 pipelines including valves, specials, sluice valves, air valves, scour valves, valve chambers, thrust block, bulk water meters for all villages, specials & accessories, etc. complete including road restoration and other allied works</p>

8	<p>(A) Providing and installation of 4 nos. suitable energy efficient deep well vertical turbine pumps for raw water at intake well cum pump house including automation as under: (a) 2 No. pumps of 7820 lpm discharge each and approx. 105m head (b) 2 No. pumps of 3910 lpm discharge and approx. 105m head The pumps given above are inclusive of standby pumps</p> <p>(B) Providing and installation of suitable energy efficient centrifugal pumps for clear water at clear water sump cum pump house at WTP, and clear water sump cum pump houses for intermediate pumping stations including automation as under:</p>																		

PHANS4 CONSULTING PVT. LTD.

Main Works

For CW Sump of 1000 KL capacity to MBR-1:

- (a) 2 Nos. (W) pumps of 3583 lpm discharge each and approx. 30 m head
- (b) 2 Nos. (S) pumps of 1792 lpm discharge each and approx. 30 m head

For CW Sump of 1000 KL capacity to MBR-2:

- (a) 2 Nos. (W) pumps of 3867 lpm discharge each and approx. 80 m head
- (b) 2 Nos. (S) pumps of 1933 lpm discharge each and approx. 80 m head

For MBR-2 to MBR-3:

- (a) 2 Nos. (W) pumps of 2583 lpm discharge each and approx. 40 m head
- (b) 2 Nos. (S) pumps of 1292 lpm discharge each and approx. 40 m head

At IPS-1:

- (a) 2 Nos. (W) pumps of 383 lpm discharge each and approx. 28 m head
- (b) 2 Nos. (S) pumps of 192 lpm discharge each and approx. 28 m head

At IPS-2:

- (a) 2 Nos. (W) pumps of 183 lpm discharge each and approx. 48 m head
- (b) 2 Nos. (S) pumps of 92 lpm discharge each and approx. 48 m head

At IPS-3:

- (a) 2 Nos. (W) pumps of 117 lpm discharge each and approx. 20 m head
- (b) 2 Nos. (S) pumps of 58 lpm discharge each and approx. 20 m head

At IPS-4:

- (a) 2 Nos. (W) pumps of 200 lpm discharge each and approx. 22m head
- (b) 2 Nos. (S) pumps of 100 lpm discharge each and approx. 22 m head

At IPS-5:

- (a) 2 Nos. (W) pumps of 200 lpm discharge each and approx. 35m head
- (b) 2 Nos. (S) pumps of 100 lpm discharge each and approx. 35m head

The pumps given above are inclusive of standby pumps.

Provision for dedicated power supply lines from nearby substation to WTP, intake well cum pump house inclusive of all allied works complete as detailed below:

- (a) 33 KV: 10 km

Provision of stretching suitable capacity electric line and taking connection for clear water sump cum pump houses. Any other work necessary to cater the power supply demand of the project (as variation).

The work includes construction of substations and stretching of power lines and internal and external electrification etc. complete at all components.

Supply, installing, testing and commissioning of following sized transformers and other ancillary works required, along with suitable sized transformer yards complete in all respects as per specifications:

- x. 2 (1W+1S) Number 630 kVA at Intake/ Raw water Pump House
- xi. 2 (1W+1S) Number 400kVA at Clear Water Pump House/ WTP
- xii. 2 (1W+1S) Number 100kVA at MBR-2
- xiii. 2 (1W+1S) Number 16kVA at IPS-1

PHANS4 CONSULTING PVT. LTD.

No	Main Works
xiv.	<p>2 (1W+1S) Number 16kVA at IPS-2</p> <p>The locations of installation of transfers are Raw Water Intake Pump House, Clear Water Pump House, WTP, Intermediate Pumping Stations (IPS), etc. 100% standby transformer capacity is to be maintained at each installation site of transformers.</p>
10	Design, Supply, Delivery, Erection, Testing & Commissioning of Automation Components for Monitoring & Maintenance with GPRS Communication with all necessary accessories. (SCADA)
11	House Service Connection approximately 21000 Nos. (up to end of O&M Period)
12	<p>Construction of Staff Quarter / Office Building:</p> <p>Office Building/Admin block - 01 No. in WTP campus - 225 sqm. Store Building - 01 No. – 75 sqm</p> <p>F-type staff quarter with minimum plinth area 46.5 Sqm each – 02 Nos. G-type staff quarter with minimum plinth area 93.0 Sqm each - 04 Nos. H-type staff quarter with minimum plinth area 46.5 Sqm each - 01 Nos. I-type staff quarter with minimum plinth area 32.5 Sqm each – 06 Nos. Office Building of 400 sqm at place directed by MPJN</p>
13	<p>Operation & Maintenance of the whole scheme for first year</p> <p>The Operation and Maintenance cost for the first year, in terms of percentage of contract Amount is given in Annexure H.</p> <p>For every subsequent year, the first-year percentage rates will be increased/ decreased according to the percentage change in consumer price index issued by Labour Bureau, GOI (All Industrial Worker) for that period. The index on the date of completion of trial run period will be treated as base for calculation of percentage point increase/decrease in O&M cost of next year. Payment of O&M will be made quarterly.</p> <p>NOTE:</p> <p>e) The operation & maintenance period is 10 years from the date of completion of three months of trial run after successful commissioning of the project.</p> <p>f) The cost of energy charges (excluding penalties) shall be paid by MPJN on reimbursement basis.</p> <p>g) Energy Requirement: The estimation for maximum yearly consumption of energy is 71,63,288 kWh (Unit) for design period. The estimate will be finalized based on the equipment installed as per the approved design. For intermediate years, payment will be made on pro rata / calculation basis.</p> <p>h) If due to any reasons, whatsoever it is desired to supply water in some of the villages before final commissioning and trial run, then the pro-rata rates derived from the Annexure H shall be applicable for the part payment on the basis of duration and quantity supplied, but the date of commissioning of whole work shall be applicable from the dates as stipulated in this contract.</p>
